

PRESS RELEASE

FOR IMMEDIATE RELEASE

Maret 07, 2022

WTP Lippo Cikarang received a visit from the Sorong City Government Comparative Study Team, West Papua

Cikarang, 07/02/22: The Comparative Study Team of the Sorong City Government, West Papua, on 24/02/22 visited the 'Water Treatment Plant III' managed by Lippo Cikarang.

It is known, 'Water Treatment Plant III' (WTP) III Lippo Cikarang is a water treatment 'plant' that has been certified by the Technical Inspection of Water Treatment Plants (IPA) and issued by the Central Inspection Agency for Research and Development of PUPR. That's the Department Head of WTP Lippo Cikarang, Arie Suryadiredja.

So far, according to Arie, WTP III Lippo Cikarang has used the highly efficient 'Continuous Sand Filter' (CSF) filter technology, with the main advantage being to produce clean water continuously without stopping, because the 'backwash' process runs continuously.

This is because the filter media in CSF technology will be kept clean at all times so that the quality and quantity of water production will be maintained constantly and continuously.

"We welcome the visit of the team from the Sorong City Government, where we can share information related to the existing process at Lippo Cikarang WTP so that it can be implemented in Sorong City, West Papua," he said.

Advantages of CSF Technology

Arie Suryadiredja then explained the advantages of CSF technology that attracted the attention of the Government of Sorong, West Papua, where they planned to build a water treatment plant in Sorong City.

Apart from Sorong City, a number of Sorong Regency Government staff were included in the group.

"The comparative study program went well and representatives of the Sorong Regency and City Governments have obtained an overview of how the water treatment system uses CSF technology," continued Arie Suryadiredja.

Teams from the Sorong City and District Governments, West Papua, represented by representatives from agencies in the two regions were brought to see firsthand the water treatment system at WTP III Lippo Cikarang.

Also attending the comparative study event was a team from PT Bioseptic Waterindo Abadi as the contractor for the construction of WTP III Lippo Cikarang.
